Two-year higher national diploma in software development, GRETA Montpellier

Baccalauréat STI
French high school diploma, electrical engineering, Narbonne

Boris Delprat

Senior full stack developer: Vue.js, Nuxt, TypeScript, Laravel

Available full time, remote, Central European Time

Profile

Eight years of web development, almost all freelance. I build clear, fast interfaces in Vue.js and Nuxt and the back ends behind them, in TypeScript, Laravel and Symfony. Used to taking over a legacy application and modernising it step by step, without breaking what works.

> **"Autonomous, versatile and committed developer!"**
> Benoit Hénache, lead developer (translated from French)

Experience

FINVENS
Freelance, 2022 to 2026, full time

- Front end of the company's business management application, working with two project managers.
- New projects in Vue.js 3 and Nuxt 3.
- Gradual rewrite of the legacy application (Vue.js and PHP).
- Rolled out AI tools.

Ubu
Employee, 2022

- Front-end development in Vue.js: the app's messaging and infinite scrolling.

Pegasus
Freelance, 2021

- Business application to assist ordering and printing, in Laravel and Vue.js.

Banque Edel
Freelance, 2019 to 2020

- Full stack development in Laravel and Vue.js for the PSD2 directive, in an agile team.

IZY-GROUP
2018

- Ecomizy, a tool for online sellers connected to the Amazon, Shopify, Stripe and Facebook APIs; IzyProducts, importing a Prestashop store into Shopify. Laravel and Vue.js.
- Projects delivered independently, client feedback, led a small team of testers.

Project

Diviant Studio
SaaS platform, 2026, designed and built on my own

- Builds and hosts websites for independent businesses: six TypeScript applications (Hono, Nuxt 3, PostgreSQL, Docker), Stripe subscriptions, visual editor with an AI assistant.
- 15,000+ automated test cases, continuous integration, AI agents for audit and QA.
